

**topoXpress** is a powerful GIS and Surveying Application for **Windows®** and **Android™**

Same rich functionality for **GIS data collectors** and **Surveyors** on both platforms.

Use your mobile phone, tablet, GNSS receiver to collect data in the field!

Offline work, large datasets, quick & responsive interface.

**1. Develop** your geodatabase for field data collection

**2. Survey** geospatial data or stakeout features in the field

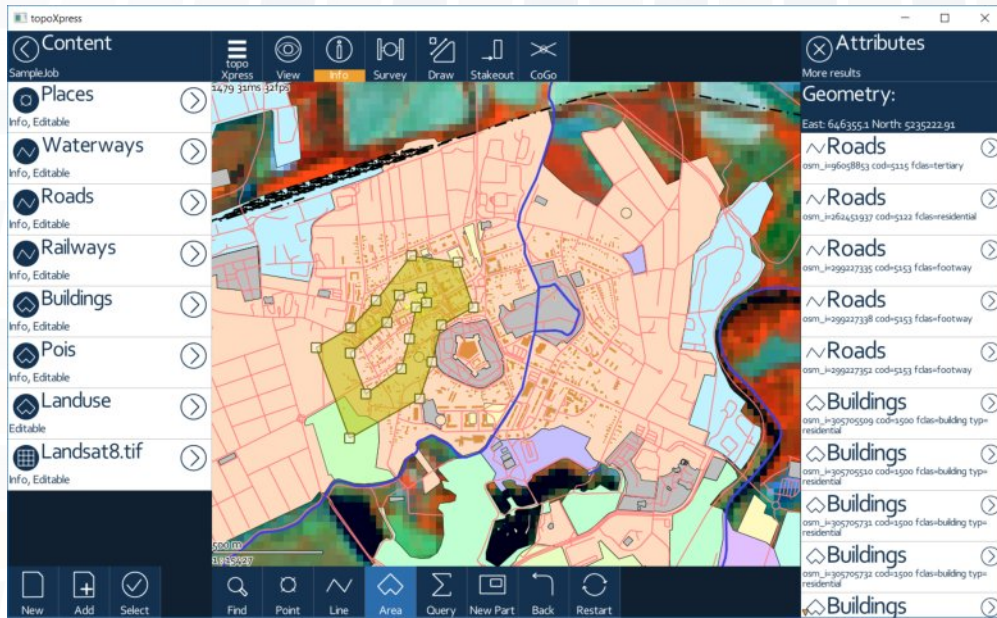

**3. Improve** your geodatabase, print & export your jobs

## System requirements

### Android OS:

Android 4.4 and up

CPU: minimum 512 Mhz

Display: minimum 800x480

RAM: minimum 512 MB

### Windows OS:

Windows Vista, 7, 8, 10

CPU: minimum 1 GHz

Display: minimum 800x600

RAM: minimum 512MB

## Key features and benefits

- 1 **Productive** data collection: job templates, GNSS surveying, stakeout, intelligent forms, calculated fields, lists, GoGo, GIS functions.
- 2 **Offline and Online** work (Google Drive, TMS, WMS, KML).
- 3 **Customizable** templates, layers and forms. Responsive user interface.
- 4 **Extensive** support of GNSS receivers, projection systems, geoids, shift grids.
- 5 Support of wide range **vector** (map, shp, mif, dxf, txt, csv, dat, dbf, tab, mid) and **raster** (jpeg, ers, tiff, geotiff, png, lan, bil, bmp) formats.

## Functionality

Job templates Open existing jobs	Information query Calculated fields	Intersections Dividing features
Content manager Thematic mapper	Measuring positions, lengths, areas	Rectangular survey Polar survey
Settings, Help Localization, Units	Surveying Multipart geometries	Feature drawing Connecting points
Projection systems Custom projection	3D stakeout Line stakeout	Polygon editing GIS functions
